SUMMARY

HTML & CSS : (I have successfully created the structure of a webpage, incorporating a variety of elements such as headings, paragraphs, images, and links. Additionally, I've utilized CSS for presentation, specifying attributes like colors, fonts, and spacing to enhance the visual appeal. Furthermore, I've implemented responsive design principles to ensure the website adapts well to different screen sizes and devices.)

javascript : (Experienced in implementing various functionalities, including animations triggered by button clicks, API fetching utilizing hooks, and creating dynamic slides. Skilled in manipulating the DOM with classList toggles, extracting attributes, and leveraging Bootstrap library for JavaScript functionalities. Ability to develop interactive web elements and ensure smooth user experiences through JavaScript-based solutions.)

Bootstrap : (Extensive experience in leveraging Bootstrap classes to create visually appealing and responsive websites. Skilled in utilizing Bootstrap's grid system, components, and utilities for efficient layout design. Proficient in customizing Bootstrap elements through manual adjustments, ensuring tailored and polished website interfaces)

Database : (I possess a strong understanding of databases, enabling me to create tables, execute new user queries, and perform deletion operations. My knowledge extends across various database systems, allowing me to proficiently manage and maintain database structures.)

Python (Django) : (I possess comprehensive knowledge of Python, particularly in the Django framework. I am proficient in creating APIs, both for my applications and for integrating with external APIs such as those from Amazon and YouTube, demonstrated through tools like Postman. I am adept at developing web applications using Django.)

: (I have a thorough understanding of Object-Oriented Programming (OOP) concepts. I can create classes, objects, methods, implement inheritance, and demonstrate polymorphism. I am also skilled in utilizing data abstraction. Furthermore, I am familiar with working with built-in packages, including handling JSON files.)

: (Knowledge of Webservice and API using POSTMAN. I have completed numerous tasks in Python, incorporating loops, diverse data types, arrays, and inheritance. These tasks range from working with various modules to creating small projects. Through these experiences, I have gained a comprehensive understanding of programming concepts, allowing me to navigate and implement solutions effectively.)

: (Good communication, collaboration with proficiency at grasping new technical concepts quickly and utilize the same in a productive manner.)
